PROFILE

AI Engineer specializing in Applied Mathematics, Generative AI, and Intelligent Systems. Skilled in Large Language Models (LLMs), Agentic AI, Machine Learning, Computer Vision, and Natural Language Processing, with experience developing intelligent, scalable, and production-ready AI solutions.

EDUCATION

ENSIT - National Higher School of Engineering of Tunis, Tunis 2023 - 2026

Engineering Degree - Applied Mathematics and Modeling

Master Research Program in Data Science (M2)

IPEIN - Preparatory Institute for Engineering Studies, Nabeul 2021 - 2023

Preparatory Cycle - Physics and Chemistry

PROFESSIONAL EXPERIENCE

Talan Tunisia Consulting, Tunis February 2026 – June 2026

AI Engineer Intern – Final-Year Project

- Developed **NexOps**, an AI-powered autonomous DevOps platform using Generative AI, Multi-Agent Systems, and LLMs.
- Built AI agents to automate CI/CD, Infrastructure as Code, Kubernetes deployment, observability, and security workflows.
- Integrated LangGraph, RAG, long-term memory, and Human-in-the-Loop validation for intelligent workflow orchestration.

Leoni Tunisia, Sousse July 2025– September 2025

Computer Vision intern

- Developed a YOLO-based obstacle detection system with multi-camera fusion.
- Implemented autonomous navigation algorithms for MiR robots using Dijkstra path planning.

Tunisie Telecom, Tunis July 2024 – August 2024

Data Analysis Intern

- Analyzed financial KPIs and developed predictive models using Python and machine learning.
- Created data visualizations to support business decision-making.

TECHNICAL SKILLS

Programming: Python, SQL, C/C++, Java

Generative AI & Agentic AI: Large Language Models (LLMs), Agentic AI, Multi-Agent Systems, Retrieval-Augmented Generation (RAG), LangChain, LangGraph

Machine Learning & AI: Machine Learning, Deep Learning, Computer Vision, Natural Language Processing (NLP), Vision-Language Models (VLMs), Reinforcement Learning, Transformers

Frameworks & Libraries: PyTorch, TensorFlow, Scikit-learn, OpenCV, Pandas, NumPy, Matplotlib, Streamlit

MLOps & DevOps: Docker, Kubernetes, Git, GitHub Actions, Terraform, Helm, CI/CD, Prometheus, Grafana

Databases & Cloud: PostgreSQL, MongoDB, ChromaDB

PROJECTS

AI-based Clinical Decision Support System 2026

Developed a Vision-Language Model (VLM) to generate structured medical reports from radiology images and support clinical diagnosis.

AI-powered Tender Recommendation Platform 2026

Developed a multi-agent AI system to scrape, rank, and analyze tenders, generating summaries and presentation slides using LLMs.

Multimodal Emotion Recognition System 2025

Developed a multimodal AI system combining vision, speech, and text to classify eight human emotions using Transformer-based models.

Quadruped Robot Locomotion using Reinforcement Learning 2025

Trained a PPO-based reinforcement learning agent in PyBullet for stable quadruped robot locomotion on uneven terrain.

CERTIFICATIONS

- [Stanford – Supervised ML: Regression & Classification](#)
- [Stanford – Advanced Learning Algorithms](#)
- [NVIDIA – Getting Started with Deep Learning](#)
- [Stanford – Unsupervised Learning, Recommenders, RL](#)

LANGUAGES

Arabic (Native) | French (B2 - Professional Working Proficiency) | English (B2 - Professional Working Proficiency)

ACTIVITIES & LEADERSHIP

Event Manager - NERDATA Club - Organized artificial intelligence conferences, coordinated technical speakers, and managed logistics for 200+ attendees.
